Monthly Digest of Statistics

No 492 December 1986 HMSO £5.75 net

A publication of the Government Statistical Service

The Government Statistical Service

A service of statistical information and advice is provided to the Government by specialist staff employed in the statistics divisions of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Department concerned.

The source for further information about series published in this volume is shown at the foot of each table. Current telephone numbers of these sources as well as general information about the *Monthly Digest of Statistics* can be obtained from the Central Statistical Office, Great George Street, London SW1P 3AQ.Telephone: 01-270 6363/6364.

Enquiries about orders and subscriptions for the *Monthly Digest of Statistics* and other Central Statistical Office publications should be made to:

Her Majesty's Stationery Office, PO Box 276, London SW8 5DT. (Telephone 01-211 8667 for subscriptions; 01-622 3316 for orders).

Introduction

This Digest has been prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments.

The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalized boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

The figures in the Digest are mainly totals for calendar months or monthly averages.

Provisional data

Some figures in *Monthly Digest* are provisional and may be subject to revision in later issues. This applies particularly to data for the most recent time periods.

Definitions

A Supplement of Definitions and Explanatory Notes, published with the February issue, gives detailed definitions of all the terms and units used in the Digest. The following general definitions should be noted in using the Digest.

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Consumption and stocks. The terms 'consumption', 'disposals' and 'stocks' are defined in detail in the Supplement to the Digest. Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

External trade. Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

Symbols and conventions used

Symbols. The following symbols are used throughout:

- .. not available
- nil or less than half the final digit shown
- * average (or total) of five weeks

Change of basis. A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

Rounding of figures. In tables where figures have been rounded the the nearest final digit, there may be a slight discrepancy between the sum of the constituent items and the total as shown.

Recent data

Figures for recent periods in a number of tables have been affected by the dispute in the coal mining industry and should be used with caution.

Central Statistical Office Great George Street London, SWIP 3AQ

30 December 1986

CSO Databank

Certain tables in this publication contain data available via the CSO Databank. Wherever this occurs the appropriate four digit identifier is included at the top of the column of figures. This is to facilitate access to the data in computer readable form and make available longer runs of data than appear in these tables.

The CSO databank is a collection of macro-economic time-series on sale to the public. The service is run on CSO's behalf by WEFA Ltd., further details can be obtained from them at:

Ebury Gate, 23 Lower Belgrave Street, London SWIW 0NW, tel: 01-730-8171.

Contents

1	National income and expenditure	Page
1.1	Expenditure on the gross domestic product	4
1.2	Factor incomes in the gross national product	6
1.3	Index numbers of output at constant factor cost	7
1.4	Personal income, expenditure and saving	8
1.5	Consumers' expenditure	9
1.6	Value of physical increase in stocks and work in progress	10
1.7	Gross domestic fixed capital formation	11
1.8	Fixed capital expenditure in manufacturing industry (revised definition)	13
1.9	Fixed capital expenditure of the construction, distribution, road transport and financial sectors (plus shipping)	15
2	Population and vital statistics	
2.1	De facto or home population	16
2.2	Age distribution of the population	16
2.3-2.4	Births and marriages and deaths registered	17
3	Employment	
3.1	Distribution of working population	18
3.2	Employees in employment: all industries	18
3.3	Employees in employment: production industries	19
3.4	Civil Service staff: analysis by ministerial responsibilities	20
3.5	UK Service personnel, intake, outflow and strengths	21
3.6	Local authority manpower	22
3.7	Numbers employed in agriculture	23 24
3.8	Overtime and short-time worked by operatives in manufacturing industries Unemployed	24
3.13	Notified vacancies remaining unfilled	27
3.14	Industrial stoppages	28
4	Social services	20
4.1	National insurance and child benefit	29
4.2	Family income supplement Supplementary benefits: pensions and allowances	29 30
4.4	Family practitioner services	30
5	Law enforcement	21
5.1 5.2	Notifiable offences recorded by the police — England and Wales Crimes and offences recorded by the police — Scotland	31 31
20.00	Crimes and offences recorded by the police — Section	31
6	Agriculture and Food	
6.1	Agricultural land: area and harvest	32
6.2-6.3	Livestock, pigs and poultry on agricultural holdings	33
6.4-6.12	Production, disposals and stocks of principal foods and feedingstuffs	35
6.13	Tobacco products	40
6.14	Alcoholic drinks	41
7	Production, output and costs	
7.1	Output of the production industries (revised definition)	42
7.2	Employment and output per head	47
7.3	Wages and salaries per unit of output and labour productivity in	
74	manufacturing industries (revised definition)	48
7.4	Total home costs and labour costs per unit of output	48
8	Energy	
8.1-8.2	Inland energy consumption: primary fuel input	49
8.3	Supply and use of fuels	50
8.4	Coal supply and colliery manpower and productivity at NCB mines	52
8.5	Coal consumption and stocks	52
8.6 8.7	Gas: sources of supply and send-out Fuel used and electricity generated by the public supply system	53 53
8.8	Sales of gas and electricity	54
8.9	Plant capacity of public electricity supply industry	54
8.10-8.11	Petroleum and petroleum products	55
9	Chemicals	
		**
9.1	Fertilisers and other miscellaneous products Sulphur and sulphuric acid	56 57
9.3	Dyestuffs and pigments: paint and varnish	58
9.4	Synthetic resins and plastics materials	59
95	Production of organic chemicals	60

Equals total final expenditure on goods and services at market prices less imports of goods and services.
 Equals gross domestic product at market prices less taxes on expenditure plus subsidies.
 Estimates of the gross domestic product at constant factor cost based on statistics of output are given in Table 1.3.

^{4.} This represents taxes on expenditure less subsidies valued at constant rates.

1.1 Expenditure on the gross domestic product: revalued at 1980 prices

Estimates of the gross domestic product obtained from statistics of expenditure are given in Table 1.1
 Revised definition comprising Divisions 1 to 5 of the Standard Industrial Classification Revised 1980. Any differences between this column and the data in Table 7.1 arise because the latter may be based on more recent information.

Before providing for depreciation and stock appreciation.
 Equals total personal income before tax less payments of taxes on income, social security, contributions and other current transfers.
 Before providing for depreciation, stock appreciation and additions to tax reserves.
 This table is revised and brought up to date in the January, April, July and October issues. In the March, June September and December issues Table 1.5 may show more up-to-date figures for consumers' expenditure than those shown here.

Personal saving as a percentage of total personal disposable income.
 Personal disposable income revalued by the implied consumers' expenditure deflator (1980 = 100).

1.5 Consumers' expenditure

£ million

1. The working population consists of the employed labour force and the unemployed (claimants); the employed labour force includes employers, self-employed and HM Forces as well as employees in employment.

2. From April 1983, the figures of unemployment reflect the effects of the provisions in the Budget for

some men aged 60 and over who no longer have to sign at an unemployment office.

3. Estimates of employees in employment up to June 1985 take account of the results of the 1983, 1984 and 1985 Labour Force surveys. Estimates for later periods include an allowance for continued undercounting (see the article on page 161 of the May 1986 Employment Gazette). Estimates of the self-employed up to mid 1985 are based on the results of the 1981, 1983, 1984 and 1985 Labour Force Surveys. The provisional estimates from September 1985 are based on the assumption that the average rate of increase between 1981 and 1985 has continued subsequently. A detailed description of the current allowances is given on page 135 of the May 1986 Employment Gazette.

4. HM Forces figures, provided by the Ministry of Defence represent the total number of UK service personnel, male and female, in HM Regular Forces, wherever serving and including those on release leave. The numbers are not subject to seasonal adjustment.

5. See Note on page 25

components, also the totals include some employees (some 3300 in 1975, 8700 in 1976 and 1400 in 1977) whose industrial classification could not be ascertained.

1. Excluding private domestic service.

2. Includes Divisions 1-5 of the Standard Industrial Classification 1980.

3. The estimates for agriculture are taken from the censuses of agriculture and exclude a small number of employees of agricultural machinery contractors.

4. Excluding members of HM Forces.

5. See footnote 2 to Table 3.3.

Note: Machinery of Government changes prior to 1 April 1983 are given in the Monthly Digest Annual

Supplement on page 5.

1. As of 1 April 1984 the Victoria and Albert Museum and the Science Museum became non-manpower count bodies, they have been accorded Trustee Status - around 1100 staff involved.

2. From 1 April approximately 1100 staff of the Directorate of Historic Monuments and Ancient Buildings have been transferred to a new commission outside the manpower count.

From 1 April 1984 responsibility for the Passport Office was passed to the Home Office from the Foreign and Commonwealth Office (around 950 staff involved).

279 non-industrial staff employed in the Radio Regulatory Department of the Home Office were transferred to the Department of Trade and Industry in June 1983.
 From June 1983 the Departments of Trade and Industry have become one department, The Department of

Trade and Industry.

Some 1454 non-industrial staff employed in the aviation and shipping divisions of the former Department of Trade were transferred to the Department of Transport, in June 1983.
 On 1 July 1984 a new department the Office of Telecommunications, was formed under the

responsibility of the Secretary of Str 'se for Trade and Industry.

8. On 2 January 1985 the Royal Ordnance Factories were incorporated as a Companies Act company and are no longer included in the manpower count.

9. There were 345,036 males and 249,329 females in the Civil Service on 1 April 1986, the latest date for which

information is available.

Regard must be taken of the effect of seasonal patterns and differences in planned annual intake levels in any
comparisons of quarterly or annual intakes.
 Some personnel have a liability for Reserve Service. The figures include deaths.
 The differences between strengths at successive dates may not match the intake and outflow figures for
corresponding periods because of delays in recording transfers between the Services and similar occurrences.

Figures are based on surveys undertaken on behalf of central and local government by the Local Authorities' Conditions of Service Advisory
Board and the National Joint Council for Local Authority Services (Scottish Councils).
 Based on following factors to convert part-time employees to approximate full-time equivalents: for teachers and lecturers in further education,
0.11; teachers in primary and secondary education and all other non-manual employees, 0.53; manual employees, 0.41.
 Provisional figures.
 Including central services departments (e.g. engineers and treasurers) and all services not shown separately.
 Includes civilian employees of police forces, traffic wardens and police cadets.

Note: There has been a change in the compilation of the unemployment statistics (see Employment
Gazette, March/April 1986, pages 107-108). Unadjusted figures for February and March 1986 are on the
new basis (estimated for February) and not directly comparable with earlier figures. It is estimated that
the change reduces the total U.K. count by 50,000 on average. Seasonally adjusted figures have been
revised to adjust for this and other discontinuities and are all consistent with the new coverage. The
latest seasonally adjusted figures are provisional and subject to revision, mainly in the following month.

1. Percentage rates have been calculated by expressing the total numbers unemployed as percentages
of the numbers of employees in employment, unemployed, self employed and HM forces at the appropriate mid-year.

2. From April 1 1983 figures are affected by the 1983 Budget provision for some men aged 60 and over
who no longer have to sign on at an unemployment benefit office.

3. There was a discontinuity between the June and August 1985 figures for unemployed claimants in Northern

Sources: Department of Employment Department of Economic Development (Northern Ireland)

- 3. There was a discontinuity between the June and August 1985 figures for unemployed claimants in Northern Ireland. The monthly count is based on the Northern Ireland Department of Economic Development's computer records. A reconciliation with information on claims for benefit held in DHSS offices showed computer records. A reconciliation with information on claims for benefit held in DHSS offices showed some people included in the monthly count who were no longer claiming benefit and some (a smaller number) who had not yet been included in the count even though they were claiming benefit. The net result was that the unadjusted July and August figures for Northern Ireland were 5 700 and 5 150 less respectively than they would have been without the reconciliation. If the figures had continued to be recorded as in June and earlier months there would have been increases in unemployment of about 3 150 in July and 650 in August. The accumulating discrepancy, since the present computer system was set up in October 1982, and the effect of the corrective action has now been taken into account in the seasonally adjusted series, so that it is consistent with the more accurate coverage of the current unadjusted data.

Note: The method used for compiling vacancy statistics has changed as from October 1985. See October issue of Source: Department of Employment

Note: The method used for compiling vacancy statistics has changed as from October 1990.

Employment Gazette.

About one third of all vacancies are notified to Jobcentres. These could include some that are suitable for young persons and similarly vacancies notified to careers offices could include some for adults. Because of possible duplication the two series should not be added together. The figures represent only the number of vacancies notified by employers and remaining unfilled on the day of the count.

Included in South East.

Vacancies on Government schemes (Enterprise Ulster and Action for community Employment(ACE)) are

Included in South East.
 Vacancies on Government schemes (Enterprise Ulster and Action for community Employment(ACE)) are not separately identified for Northern Ireland prior to December 1983.
 The statistics of vacancy stocks were distorted in April and May because of a change in MSC's Employment Division's administrative arrangements. This led to an artificial increase in the April (March 29) level of unfilled vacancies, but the recorded stocks of unfilled vacancies for May should be minimally affected.

^{5.} Includes vacancies on the Community Enterprise Programme, the forerunner of Community Programme.

Excludes stoppages involving fewer than 10 workers or lasting less than one day except any in which the
total number of working days lost exceeded 100. There may be some under-recording of small or short
stoppages; this would have much more effect on the total stoppages than on working days lost. The figures
for 1986 are provisional.
 The figures of working days lost relate to the total working days lost within each of the periods shown as a
result of stoppages in progress in that period, whether the stoppages began in that period or earlier.

Source: Department of Health and Social Security

1. Includes overseas cases.

2. Yearly figures are averages of quarterly figures. Quarterly figures relate to the Thursday following the first Monday in the month.

3. Excluding claims made under the emergency benefit procedure. Figures for individual months are averages of the four or five weeks starting on the first Monday of each month.

4. Figures for individual months are averages of the four or five weeks ending on the last Tuesday of each

5. Excluding pensioners in receipt of non-contributory retirement pension awarded under National Insurance Acts 1970 and 1971 and cases where graduated pension only was awarded. 6. Including a diminishing number of widows with pensions of £1.50 a week derived from the old Contributory Pensions Acts. 7. Data not available due to industrial action. 8. Provisional.

1. Figures include estimates for minor holdings in England and Wales but not for Scotland and Northern Ireland. For further details refer to the Supplement of Definitions.

2. Prior to 1988 collected as 'Beans for stock feeding' in England and Wales.

3. Fodder beet in Northern Ireland is included with turnips and swedes. In Scotland fodder beet was collected separately for the first time in 1986. It was previously included with turnips and swedes.

4. Includes 'Peas for harvesting dry for both human consumption and stockfeeding' from 1984 onwards.

5. Figures relate to land usage at 1 June and are not necessarily good indicators of production as for some crops more than one crop may be obtained in each season or a crop may overlap two seasons.

6. Following a change of definitions in 1986 'Horticultural crops' now excludes 'Peas for harvesting dry for human consumption ' as well as 'Mushrooms'. The data from 1984 reflect this change.

7. Included with other vegetables from 1983 onwards.

8. Excludes area of small fruit grown under orchard trees in England and Wales which is returned as orchard.

9. Provisional.

9. Provisional.

Sources: Agricultural Departments

 Except for sugar beet and hops the production area for England and Wales is the area returned at
the June census together with estimates for minor holdings. In Scotland and Northern Ireland the area returned at June is also the production area except that estimates for minor holdings are included in Scotland for potatoes and in Northern Ireland for barley, oats and potatoes.

2. Crop production figures for wheat and barley have been rounded to the nearest 10,000 tonnes:

mixed corn, rye and hops to the nearest 1,000 tonnes and other agricultural crops to the nearest 5,000 tonnes.

3. The yield and production data for sugar beet and hops are obtained from British Sugar plc and English Hops Ltd. respectively.

4. From 1984 the method of calculation of the potato yield and production data has been changed. The figures are now derived from Potato Marketing Board statistics.

5. Collected as turnips, swedes and folder beet in Scotland.

5. Collected as turnips, swedes and fodder beet in Scotland.
6. Yields are estimated average gross yields, ie the weight of crop that was available for harvesting from each hectare cropped during a single crop year. No deductions are made for the possibility that some of the crop was not harvested or for losses following harvesting.
7. Production is the product of yields and cropped areas. For some vegetable crops, the areas under production may produce more than one crop during a single season and will therefore be greater than the areas measured by the June census (i.e. Table 6.1) by a factor equalling the number of crops harvested in any given year. Figures represent the maximum available sumply during a single convert morningly the period I. June to 31 May. the maximum available supply during a single crop year, nominally the period 1 June to 31 May during which the bulk of the crop is harvested.

1. Based on returns from Potato Marketing Board and Ministry of Agriculture, Northern Ireland.
2. Back dated figures may differ from those previously published (prior to April 1986) due to a more reliable data coverage which was not previously available.
3. From January 1984, recorded stocks of imported and home-produced supplies of raw and refined sugar.
4. From January 1984, total UK consumption by food and other industries (including sugar used in manufactured goods).
5. Includes movements through recorded sources and an allowance for unrecorded sales. Potatoes processed for export are excluded.
6. Changes in stocks differ from movements into human consumption due to wastage when dressing potatoes on producers/merchants' premises.
7. From January 1984, total UK consumption excluding use by non-food industries.
8. 53-week period for syrup and glucose.
9. Estimated figures.

Source: H. M. Customs and Excise

^{1.} The figures relating to both home production and releases for home consumption take account of brewing at high gravity with the addition of some brewing liquor after fermentation.

2. Percentage alcohol by volume.

3. Before April 1983, the figures represent quantities of all mature home-produced spirits.

4. Includes imported spirits.

5. A small quantity of molasses spirit is used in beverage spirit production. See explanatory notes to Section 9 in the Supplement of Definitions and Explanatory Notes for this publication.

6. Provisional.

7. For the period April 1984 to July 1985 the middle band included wineof a strength of exactly 15 percent.

Production, output and costs

The figures for manufacturing industries contain, where appropriate, an adjustment for stock changes and for measurement bias - see supplementary notes 1987 edition.
 For an index of construction output for Great Britain see Table 12.1
 Mainly building materials.
 Industries are grouped according to the Standard Industrial Classification 1980.
 Parts per thousand of GDP(O).

Electricity and gas sent out, water supply and nuclear fuel production.
 Mainly building materials.
 Industries are grouped according to the Standard Industrial Classification 1980.
 Unadjusted data may be obtained from the Central Statistical Office at the address shown inside the front cover of this publication.

This does not include grain milling, starch, compound animal feeds and processing organic oils and fats industries which are classified to intermediate goods-materials.
 These sum to the total of 1 000 for the production industries.
 See footnote 4 on page 43.

The figures for manufacturing industries contain, where appropriate, an adjustment for stock changes and for measurement bias - see supplementary notes 1987 edition.
 For an index of construction output for Great Britain see Table 12.
 Mainly building materials.
 Industries are grouped according to the Standard Industrial Classification 1980.
 Parts per thousand of GDP(O).
 Includes adjustments to standardise the length of months.

Employment and output per head1

Output per head is the ratio of the output index numbers published in Table 7.1 and the employed labour force. A monthly series for total manufacturing industries is presented in Table 7.3.
 Detailed figures are being revised.
 Based on the output measure of Gross Domestic Product.
 Revised definition.

The method for calculating whole economy unit wage cost has been revised. The output
measure of GDP has replaced the income measure in the calculation, and an adjustment
incorporated to cover the earnings of the self-employed. See Employment Gazette, May 1986.

Consumption by fuel producers plus disposals to final users plus (for annual figures only) net foreign trade and stock change in other solid fuels. See also footnotes 6. and 7. to Table 8.5.
 Inland deliveries for energy use plus refinery fuel and losses minus the differences between deliveries to and actual consumption at power stations and gas works.
 Including non-energy use and excluding gas flared or re-injected.
 Also temperature corrected.
 From August 1985, the figures show the estimated annual cutturn.
 Not Seasonally adjusted.
 Provisional.

Including an estimate for slurry, etc., recovered and disposed of otherwise than by the National Coal Board.
 As recorded in the Overseas Trade Statistics.
 Saleable deep-mined revenue coal.
 Output from production faces divided by production manshifts.

^{1.} Great Britain only.

^{1.} Great Britain only.
2. Disposals by collieries and opencast sites.
3. Excluding distributed stocks held in merchants' yards, etc., mainly for the domestic market and stocks held by the industrial sector.
4. Public supply and railway and transport power stations.
5. Gas works, low temperature carbonisation and patent fuel plants.
6. For 1984 onwards, includes estimated proportion of total imports.
7. Including miners' coal.
8. Anthracite, dry steam coal and imported naturally smokeless fuels.
9. Includes public administration and commerce.
10. Partly estimated.

1. Including coke and Natural Gas.

2. Including quantities used in the production of steam for sale.

Including guarattees used in the production of steam for sale.
 Including oil used in gas turbine and diesel plant and for lighting up coal-fired boilers.
 Including generation by gas turbine, diesel and hydro-electric plant.
 Used on works and for pumping at pumped storage stations.
 Including net imports and purchases from outside sources mainly UKAEA and British Nuclear Fuels.

Sales of gas and electricity by the public supply systems 8.8

^{1.} The term indigenous is used in this table for convenience to include oil from the UK Continental Shelf as well

source: Department of En
as the small amounts produced on the mainland.

2. Crude oil plus condensates and petroleum gases derived at onshore
treatment plants.

3. Includes process (partly refined) oils.

4. Includes condensate for distillation.

5. Mainly recycled products.

6. Forei
trade as recorded by the petroleum industry and may differ from figures published in the Overseas Trade Statistics.

7. Mainly process oils but
may include re-exports of crude oil.

8. International marine bunkers.

9. Provisional. Source: Department of Energy

Sources: Department of Trade and Industry HM Customs and Excise Fertiliser Manufacturers Association

Years ended 31 May.
 Nutrient content.
 Total weight of compound fertilisers.
 Industrial ethyl alcohol is distilled from molasses or derived from other processes: the current usings of molasses spirit in beverage spirit production are believed to be comparable with the usings in the preceding financial year - see explanatory notes in the Supplement of Definitions and Explanatory Notes.
 Figures relate to sales by manufacturers in the United Kingdom who are classified to AH 2581 (Soap and synthetic detergents) previously MLH 275, and who from the first quarter 1981 employ 50 or more, replacing the previous employment level of 25. From the first quarter 1980, figures exclude sales of household cleaning liquid detergent and from the first quarter 1981, sales of paste synthetic detergents.

Figures relate to sales by UK manufacturers employing 75 or more persons from 1st quarter 1981 replacing the
previous employment level of 25.
 Figures from 1st quarter 1983 to 4th quarter 1983 and 1st quarter 1986 to 2nd quarter 1986 for products of
condensation, polycondensation and polyaddition exclude polyamides and silicones. A comparable figure for
4th quarter 1982 would be 132.4.

3. Figures from 1st quarter 1984 exclude flexible and rigid foam for products of condensation, polycondensation and polyaddition. A comparable figure for 4th quarter 1983 would be 145.6.

4. Figures from 1st quarter 1983 for cellulosics and other plastics and modified natural resins consist only of

regenerated cellulose film; an equivalent figure for 4th quarter 1982 would be 13.5.

5. From 2nd quarter 1983, figures for intermediate forms between the resin and semi-fabricated stages exclude mouldings and extrusion compounds of phenolics. A comparable figure for 1st quarter 1983 would be 55.9.

6. Figures from 1st quarter 1984 for semi-finished products exclude copper clad and glass based industrial laminated thermosetting sheet and extruded flexible plasticised film. A comparable figure for 4th quarter 1983 would be 108.5.

Lead reclaimed from secondary scrap material, and lead refined from bullion and domestic ore, including antimonial lead.
 Including toll transactions. Figures of Home consumption of lead comprise imported primary, secondary, English refined and antimonial lead.
 Excluding secondary.
 Stocks held by consumers and LME warehouses.
 Including scrap.

Note: More detailed information can be found in the PQ series of Business Monitors for the activities listed above.

Source: Department of Trade

1. As a result of the introduction of the new and improved register of business, the series of sales of principal products given in the above table has been revised beck to 1980.

2. These figures represent the total sales of principal products of each activity. Estimates of the sales of principal products of establishments falling below the employment threshold of the Quarterly Sales Inquiries are included.

3. Provisional.

4. Excluding ferrous and non-ferrous metal foundries AH3111/2, and heat and surface treatment of metals, including sintering AH 3138.

5. Excluding process engineering contractors

AH 3246.

6. Figures for this industry have been revised in line with those published in the First Quarter 1986 Business Monitor.

7. Excluding electrical equipment installation AH 3480.

8. Excluding shipbuilding and repairing AH 3610, and cycles and motor cycles,

AH 33344

Includes naval vessels registered as merchant ships.
 Gross tonnes is a constructed measure of the volume of all the enclosed spaces in a vessel except those occupied by engines, bunkers and crew.
 The total tonnage specified on ordering vessels differs slightly from total actual measured tonnage on completion.
 Vessels are shown for export if they are for other than UK registration.
 Modifications include alterations of 500 gross tonnes or more to the tonnage and the country of registration of vessels already on order.
 From Q1 1984 gross tonnage conforms to 1969 International Maritime Organisation Convention on tonnage measurement of ships.
 Modifications and cancellations exceed new orders for the period.

Textiles and other manufactures

11.1

Index numbers of textile and clothing industries

Standard Industrial Classification 1980 Seasonally adjusted

The methodology underlying the census is different from 1978 onwards compared to previous years.
 For years up to 1982 retrospective counts within these new taxation classes have been estimated.
 See notes and definitions – Taxation Class changes.

13.2

3. Includes taxis.
4. Includes agricultural vans and lorries and showmen's goods vehicles licensed to draw trailers.
5. Includes combine harvesters, mowing machines, digging machines, mobile cranes and works trucks.

Includes three wheelers, pedestrian controlled vehicles and showmen's haulage.
 Includes personal and direct export vehicles.
 From 1979 includes exempt tax classes 61 and 62 not previously included.

9. From 1980 excludes electric goods vehicles which are now exempt from licence duty.

10. From 1980 includes electric vehicles which are now exempt from licence duty.

11. Includes old vehicles exempt from tax converted for the first time to the DVLC system.

1. The four-weekly averages for each year are computed from calendar year totals.
2. From January 1984 figures for British Rail show 'sponsored' journeys, not 'originating' journeys. A 'sponsored' journey is a journey on any Business sector of BR irrespective of the Business sector on which the journey originated.
3. Excludes journeys by Motorall services.
4. On annual season tickets, journeys are estimated at the rate of 480 per annum; on other season tickets, 540 per annum.
5. Journeys on all season tickets are estimated at the rate of 600 per annum.
6. Provisional.
7. LRT figures for 30-day period ended 31 March.
8. 26-day period.

8. 26-day period.

8. 26-day period.

Note: The statistics are on an overseas trade statistics basis (see footnote 1. to Table 15.7.)

These are defined as ships, North Sea installations (together comprising SITC (Rev 2)(793), aircraft (792) precious stones (667) and silver (681.1.)).
 Based on the Classification by Broad Economic Categories (BEC) published by the United Nations.

Note: The statistics are on an overseas trade statistics basis (See footnote 1 to Table 15.7) to which a number of changes have been made to the coverage, with effect from 1 January 1981. The changes, which are described below, were previously taken into account by means of balance of payments adjustments.

which are described below, were previously taken into account by means of balance of payments adjusting. Trade in precious stones now excludes consignments which cross national boundaries on a temporary basis only, i.e. for valuation or for exhibition, previously these were included in the Overseas Trade Statistics figures each time they arrived or left the United Kingdom.

b) Trade in secondhand aircraft is excluded where the aircraft are being imported or exported solely for the purpose of repair or modification, but the value of the work done in undertaking the repair or modification is included.

c) Certain atomic energy materials previously excluded are now included.

1. The numbers on the left hand side of the table refer to the Section and Division code numbers of the Standard International Trade Classification, Revision 2.

Note: The statistics are on an overseas trade statistics basis (see footnote 1 to Table 15.7 and Note on page 91).

1. Prior to 1st January 1986 items valued at less than £200 have not been allocated to specific countries and areas.

With effect from 1st January 1986 the threshold has been raised to £475.

^{1.} Statistics of visible trade on a balance of payments basis (shown in Table 16.1) are obtained by making certain adjustments in respect of valuation and coverage to the statistics recorded in the Overseas Trade Statistics.

These adjustments are described in detail in United Kingdom Balance of Payments 1983 Edition.

Export unit value as a percentage of the import unit value index.

Note: The statistics are on an overseas trade statistics basis (see footnote 1 to Table 15.7).

These are defined as ships, North Sea installations (together comprising SITC (Rev 2) (793), aircraft (792), precious stones (667) and silver (6811)).
 Based on the Classification by Broad Economic Categories, (BEC) published by the United Nations.

Source: Department of Trade and Industry

^{1.} The ratios were first introduced in an article in the August 1977 edition of Economic Trends The Home and Export Performance of United Kingdom Industries' which described the conceptual and methodological problems involved in measuring such variables as 'import penetration'. The latest ratios for the full detail within manufacturing (over 200 AHs) are shown in business monitor MQ12 Import Penetration and Export Sales for Manufacturing Industry. An article in Economic Trends giving a longer back run of the ratios on a Standard Industrial Classification 1980 basis is planned for release at a later date.

2. The calculation of the ratios is inappropriate for certain industries. In such cases, and where suitable data are not available, the industry has been omitted from the analysis. The Activity Headings concerned are: AH2247.2 Precious metals, AH 2396 (pt) Unworked precious stones, AH2436 Ready-mixed concrete, AH3188 Heat and surface treatment of metals, AH3246 Process engineering contractors, AH3480 Electrical equipment installation, AH4121 Slaughterhouses, AH4370 Textile finishing, AH4560 Fur goods, AH4672 Shop and office fitting, AH4910 Jewellery and coins, AH4830 Photographic and cinematographic processing laboratories.

July

August September October

November

For further details see Financial Statistics, Tables 3.9 6.1 7.1 7.5 7.6 7.10 9.3 12.1.
 Total administered by the Department for National Savings.
 Monthly figures relate to banking months.
 The statistical definition of the banking sector was changed with effect from 18 November 1981 to include all recognised banks, licensed deposit taking institutions and the Trustee Savings Banks, it will henceforth be called the Monetary Sector. For further details see Bank of England Quarterly Bulletin for September 1981.

The figures for M0 are the average of levels during December, whereas for M2 and for broad money, £M3 and PSL2, they are the levels as at the end of December. The figures for December 1981 is shown in the first line levels on the basis of the old banking sector and in the second line on the basis of the new monetary sector. Banking sector levels for December 1981 are partly estimated.
 The figures for M0 are the changes between the average levels in each month. Source: Bank of England

^{1.} The Cost of Living Advisory Committee (now renamed the Retail Prices Index Advisory Committee) recommended in 1962 that until a satisfactory index series based on actual prices became available half the expenditure on meals out should continue to be allocated to the food group and the other half spread proportionately over all groups, including the food group. The index for meals out for 16 January 1968 implicit in this recommendation was 121.4. Since January 1968 an index series based on actual prices has been available and indices in this series have been linked with the implicit index for meals out for 16 January 1968, to obtain indices for meals out with 16 January 1962 taken as 100.

Note: The purpose and methodology of the Tax and price index were described in an article in the August 1979

Source: Central Statistical Office issue of Economic Trends and in the September Economic Progress Report published by the Treasury. The purpose is to produce a single index which measures changes in both direct taxes (including national insurance contributions) and in retail prices for a representative cross-section of taxpayers. Thus, while the Retail prices index may be used to measure changes in the purchasing power of after-tax income (and of the income of non-taxpayers)

the Tax and price index takes account of the fact that taxpayers will have more or less to spend according to changes in direct taxation. The index measures the change in gross taxable income which would maintain after tax income in real terms.

1. These figures reflect the late timing of the 1979 budget.

Index numbers constructed on a net sector basis, i.e. transactions within sector are excluded.
 Index numbers are compiled exclusive of VAT. Revenue duties on cigarettes, tobacco, alcoholic liquor, matches and mechanical lighters are included. Duty on hydrocarbon oils is included in series for materials and fuel purchased by broad sectors of industry but excluded from output price series.

^{3.} Provisional.

For footnotes 4 to 6 see page 116.

4. A base weighted (1980=100) combination of the separate price indices for contractors' output in the

A naise weighted (1890-190) combination of the separate price indices for contractors output in five new work sectors.
 The index covers only dwellings on which building societies have approved mortages during the period. The cost of land is included.
 Figures are based on a monthly return covering 90 per cent of building society mortgages.
 Revised.

Average weekly earnings of manual employees1

The figures represent the average earnings including bonus, overtime,etc., and before deduction of
income tax or insurance contributions, in one week in the month indicated. Administrative and clerical
workers and other salaried persons have been excluded.
 Workers ordinarily employed for not more than 30 hours per week are classified as part-time.

England and Wales only.
 Because of a dispute in the steel industry, insufficient information is available to enable a reliable index for 'metal processing and manufacturing' to be calculated, but the best possible estimates have been used in the compilation of the indices for manufacturing and whole economy. The index series for this group has a base of April 1980=100.
 Provisional.

Note: The seasonal adjustment factors currently used for the SIC 1980 series are based
on data up to December 1982.
A new service industries series has been introduced into Table 5.1 in Employment Grazette from the October 1986 issue.
1. Percentage change over previous twelve months.
2. Provisional.

18.12 Index of purchase prices of the means of agricultural production and of producer prices of agricultural products¹

Units of measurement

I. Common units of measurement and their equivalents

Length				
	1 millimetre (mm)	= 0.03	370 1 inches	
1 centimetre (cm)	= 10 millimetres		3 701 inches	
1 metre (m)	= 1,000 millimetres	= 1.09		
1 kilometre (km)	= 1,000 metres		1 371 miles	
	1 inch (in)	25.4	· · · · · · · · · · · · · · · · · · ·	
1 foot (ft.)	3		nillimetres or 2.54 centimetres	
1 yard (yd.)		= 0.30		
1 mile		= 0.91		
i mile	= 1,760 yards	= 1.60	9 34 kilometres	
Area				
	1 square centimetre	= 0.16	square inches	
1 square metre (m²)	 million square millimetres 	= 1.19	5 99 square yards	
1 hectare (ha)	= 10,000 square metres	= 2.47	1 05 acres	
1 square kilometre (km²)	= million square metres	= 247.10	5 acres	
	1 square inch (sq. in.)	= 645.16	square millimetres or 6.451 6 square	centimetres
1 square foot (sq. ft.)	= 144 square inches		2 903 0 square metres or 929.030 squa	
1 square yard (sq. yd.)	= 9 square feet		6 127 square metres	
1 acre	= 4,840 square yards		square metres or 0.404 686 hectares	
1 square mile (sq. mile)	= 640 acres		9 99 square kilometres or 258.99 hec	
Volume				
	1 cubic centimetre (cm ³)	= 0.06	1 023 7 cubic inches	
1 cubic decimetre (dm³)	= 1.000 cubic centimetres		5 314 7 cubic feet	
1 cubic metre (m³)	= million cubic centimetres		7 95 cubic yards	
	1 cubic foot (cu. ft.)	= 0.02	8 316 8 cubic metres or 28.316 8 cubi	r decimetres
1 cubic yard (cu. yd.)	= 27 cubic feet		4 555 cubic metres	0 000111101100
Capacity				
1 litre (I)	= 1 cubic decimetre	= 0.22	00 gallons	
1 hectolitre (hl)	= 100 litres	= 22.00	9	
Thectonire (ni)	= 100 litres	= 22.00	gallons	
	1 pint	= 0.56		
2 pints	= 1 quart	= 1.13		
8 pints	= 1 gallon		6 09 cubic decimetres or 4.546 litres	
36 gallons (gal.)	= 1 bulk barrel	= 1.63	6 56 hectolitres	
Weight				
	1 gram (g)		5 274 0 ounces	
1 kilogram (kg)	= 10 hectograms	= 2.20	4 62 pounds	
1 tonne (t)	= 1,000 kilograms	= 1.10	2 31 short tons or 0.984 2 long tons	
	1 ounce avoirdupois (oz.)	= 28.34	95 grams	
1 pound avoirdupois (lb.)	= 16 ounces		3 592 37 kilograms	
1 hundredweight (cwt.)	= 112 pounds	= 50.8		
1 short ton	= 2,000 pounds		34 74 kilograms or 0.907 184 74 tonne	s
1 long ton	= 2,240 pounds		kilograms or 1.016 05 tonnes	
1 ounce troy	• = 480 grains	= 31.10	03.5 grams	

II. Other units and equivalents used in the Monthly Digest of Statistics

Energy	British thermal unit (Btu)	The amount of heat required to raise 1 lb. of water through 1 degree fahrenheit at or near 39.1 degrees fahrenheit 100.000 British thermal units					
	Therm						
	Gigawatt hour (GWh)	106 kilowatt hours					
	Megawatt (MW)	106 watt					
	Terawatt hour (TWh)	109 kilowatt hours					
Food and drink:	Butter	23.310 litres milk	= 1 tonne butter (average)				
	Cheese	10,070 litres milk	= 1 tonne cheese				
	Condensed milk	2,550 litres milk 2,953 litres skimmed milk	 1 tonne full cream condensed milk 1 tonne skimmed condensed milk 				
	Milk	1 million litres	= 1,030 tonnes				
	Milk powder	8,054 litres milk	= 1 tonne full cream milk powder				
		10,740 litres skimmed milk	= 1 tonne skimmed milk powder				
	Eggs	17,126 eggs	= 1 tonne (approximately)				
	Sugar	100 tons raw sugar	= 95 tonnes refined sugar				
	Beer	1 bulk barrel = 36 gallons irrespective of gravity					

Monthly Digest of Statistics

The Monthly Digest of Statistics provides basic information on 20 subjects including population, employment and prices, social services, production and output, energy, engineering, construction, transport, catering, national and overseas finance and the weather.

The Monthly Digest of Statistics contains mostly runs of monthly and quarterly estimates for at least two years and annual figures for several more.

Other CSO monthlies are Financial Statistics and Economic Trends

The Monthly Digest Annual Supplement gives definitions and explanatory notes for each section. An index of sources is included.
